

EMP 1-Paper 2: Are your kidneys ok? Detect early to protect kidney health

Word / Phrase	Synonyms
identification	recognition, detection, diagnosis
endothelial damage	vascular injury, blood vessel impairment, endothelium injury
asymptomatic	without symptoms, symptom-free, clinically silent
health infrastructure	healthcare system, medical framework, care facilities
coordinated efforts	joint action, collaborative initiatives, collective work
kidney health agenda	renal health strategy, nephrology plan, public kidney program
align	coordinate, synchronize, harmonize
timely treatment	prompt therapy, early intervention, rapid care
substantial gaps	significant deficiencies, major shortcomings
disease trajectory	illness progression, path of disease, clinical course
implement	apply, carry out, execute
sustainable solutions	long-term strategies, enduring remedies
prevalent	widespread, common, frequent
social deprivation	poverty, socioeconomic disadvantage, hardship
preterm birth	premature birth, early delivery, before term birth
disproportionately	unequally, excessively, unjustifiably
surpass	exceed, outperform, overtake
remarkable	extraordinary, noteworthy, exceptional
non-communicable disease	chronic illness, long-term disease, non-infectious disease
projected	predicted, forecasted, anticipated
dementia	cognitive decline, memory loss, neurodegeneration
profound effects	serious impacts, significant consequences, deep influence
hemodialysis	blood dialysis, renal replacement therapy
comprise	include, consist of, be made up of
account for	represent, constitute, explain
pre-eclampsia	pregnancy-induced hypertension, gestational hypertension disorder
systemic lupus erythematosus	lupus, autoimmune disease, chronic inflammatory disorder
vasculitis	blood vessel inflammation, vascular inflammation
obstructive uropathy	urinary tract blockage, urinary obstruction
congenital anomalies	birth defects, developmental abnormalities
unknown etiology	unidentified cause, uncertain origin, idiopathic
envenomation	poisoning, toxin exposure, venom injury
environmental toxin	pollutant, harmful substance, ecological poison

endemic area	localized region, disease-prone zone
incidence	occurrence, rate, frequency
gestational age	fetal age
poor health literacy	limited medical knowledge, low patient awareness
tertiary prevention	advanced prevention, late-stage intervention, specialized prevention
utilize	use, apply, employ
identical to	same as, equivalent to, exactly like
haphazard	random, unplanned, disorganized
albuminuria	protein in urine, urinary albumin, proteinuria
startlingly	surprisingly, shockingly, unexpectedly
visceral adiposity	abdominal fat, central obesity, intra-abdominal fat
contribute to	lead to, play a role in, add to
monocyte microinflammation	immune cell inflammation, monocyte-driven inflammation
threshold	limit, cut-off point, boundary
frailty	weakness, vulnerability, debilitation
feasibility	practicability, viability, workability
assay availability	test accessibility, lab test provision, commercial availability of the test
semiquantitative	partly numerical
resource-constrained	limited resources
urine protein dipstick testing	urine protein check with a dipstick
hematuria	blood in urine, urinary bleeding
notable	significant, remarkable, important
IgA nephropathy	Berger's disease, glomerular kidney disease, IgA-related nephritis
risk stratification	risk classification, risk assessment
prognosis	disease outlook, predicted outcome
hydronephrosis	kidney swelling, renal dilation, fluid-filled kidney
urinary retention	inability to urinate, bladder retention, urine blockage
antenatal ultrasound	prenatal ultrasound, pregnancy scan, fetal imaging
donate	give, contribute, offer
post-donation surveillance program	follow-up program, donation tracking plan
interdisciplinary care	multidisciplinary care, integrated care, collaborative healthcare
pharmacologic intervention	drug treatment, medication therapy, pharmaceutical approach
paradigm-shifting medications	groundbreaking drugs, revolutionary treatments, innovative therapies
herald	signal, announce, indicate
confer	grant, give, provide
enormous costs	huge expenses, massive expenditures

Medicare	health insurance program, government healthcare, public medical coverage
annually	yearly, every year
catastrophic	disastrous, devastating, ruinous
healthcare expenditures	medical costs, health expenses, treatment spending
incremental cost effectiveness ratio	additional cost-effectiveness index
per capita	per person, per individual, per head
drastically	severely, extremely, intensely
barriers	obstacles, hurdles, impediments
underpinned	supported, grounded, sustained
perceived	considered, regarded, viewed
leverage	use, influence
joint advocacy programs	collaborative campaigns, united lobbying efforts, collective initiatives
health policy agendas	public health strategies, medical policy frameworks, government health priorities
